CMSC 206: Data Structures
Assignment 6: Test Corrections
to be handed in, on paper, during class on Thursday, April 12, 2018

Complete test corrections on exam 2. Here are the rules:

- Complete your corrections on the original exam paper. If you are unable to get a copy of your original exam, email me and I can email you a PDF to print out. Do *not* use a separate sheet of paper for corrections.

- Use a different color pen(cil) for your corrections. Do *not* simply label "old" and "new" sections.

- You may use any resources you like, including each other and Eclipse.

- Corrections will be accepted on an all-or-nothing basis: if your new answer is not fully correct, you get no additional credit. This rule will be applied question by question.

- You can earn back half the points you lost on a question by submitting corrections.

- All questions are available for test corrections.
